DO IT YOURSELF

GARAGE DOOR INSULATION KIT

FOR 8' & 9' METAL GARAGE DOORS

- An after market garage door insulation kit to upgrade non-insulated metal garage doors.
- Easy to install, usually in less than an hour, and requires just a few tools.
- Falcon Foam Garage Door Insulation Kits are manufactured with long lasting, EPS insulation.
- Exposed face made of High Impact Polystyrene (HIPS) Laminate.
- Scored for easy, flexible installation.
- Superior durability and easy cleaning for an attractive appearance.
- Same product used by garage door manufacturers.

Thickness	R-Value*
1 1/4"	4.5 @ 75°F

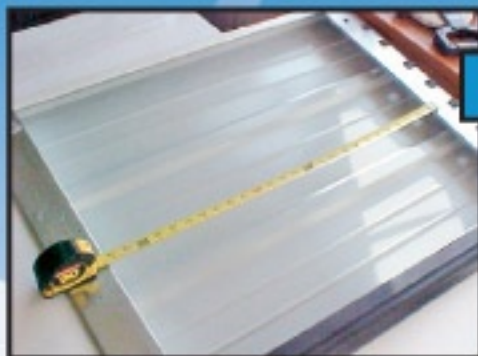

*WHAT YOU SHOULD KNOW ABOUT R-VALUES

R means resistance to heat flow. The higher the R-value, the greater the insulating power. Compare insulation R-values before you buy. There are other factors to consider. The amount of insulation you need depends mainly on the climate you live in. Also, your fuel savings from insulation will depend upon the climate, the type and size of your house, the amount of insulation already in your house, and your fuel use patterns and family size. To get the marked R-value, it is essential that this insulation be installed properly.

INSTALLS IN 3 EASY STEPS!

1 Measure the distance between the vertical rails and cut each sheet of insulation to the proper length.

2 Measure the depth of the vertical rails and cut the excess insulation to size and place behind the vertical rails.

3 Insert the insulation panels (laminated side facing out) between the horizontal and vertical rails. The

insulation panels are scored allowing you to bend the panels into place. Insert the panel under one horizontal rail, carefully bend the panel and place the other side behind the opposite rail. Minor trimming of insulation panels is required to fit around various hardware located on the door.

REQUIRED TOOLS:

Safety Goggles

Tape Measure

Box Cutter

Straight Edge

Work Gloves

Garage Door Insulation Kit Specifications:

Kit contains 8 panels each - 1 $\frac{1}{4}$ " x 20 $\frac{1}{4}$ " x 54"

Panels are scored and High Impact Polystyrene laminated

Fit most standard 8' & 9' metal garage doors

Two kits required for 16' & 18' garage doors

Shipping Dimensions: 10 $\frac{1}{2}$ " x 20 $\frac{1}{2}$ " x 54"

Shipping Weight: Approximately 10 lbs.
